PRECISION BALL

PRECISION BALL

INDUSTRY

- pump
- chemistry
- petrochemistry

MATERIAL

- aluminum oxide
- silicon nitride

APPLICATION

- dosing
- sealing

Ceramic precision balls are available in various materials and dimensions. Precision balls are applied in several products, such as valves, ball bearings and in measuring equipment. Ceratec holds a large stock of precision balls, ready to supply.

CHARACTERISTICS OF THE CERAMIC PRECISION BALL

- high tolerances
- smooth surface
- extreme hardness
- high load capacity
- low weight
- low cost, high quality
